

## India and It's Scams

Dark web done by rice ball candidates with support from USA Corporate Companies.

All fake data including Banks. Audits are not done even did they never complain and bribe. Government s doing crimes and escaped by power next goverment is also not questioned cause only two parties are saimenteniously. Goverment Leaders insider trading and suport of police they did all crimes.

Mafia reach high due to no audits Corporate Companies are hiding money on employees salries and frauding banks by fake documents and ecasping money. Even scape money by vendor or customers also. Film Industry doing films by very less money and became richest all. Where i found every film has idone by 400Cr to 500Cr which they said low budget films as 40Cr to 50Cr as profit or loss of 20Cr. No audits done. 40Cr budget film if he did exceus of 10Cr he will became slave for morethan 10 years due to bank intrests and other finanical crisis but how they did 400Cr to 500Cr? Not exception for high budget films which are 1500Cr to 2000Cr and risk also high due to Indian market no returns. All are earned somewhere else by these crimes and with this films. Then became rich. For money to mafia India allowed Biological researchs and other crimes. For this Mafia govt giving Rice Balls and Mobile phones when they need riots they need vehicles so you can get very cheaper as 6Cr Vehicle as just 6Lakhs no one dont know how possible at 99% discount with high tax because companies margins are 5% to 10% only that means world is cheating them or India is Cheating World? And for vehicles need fuel so India deal with Russia during pandemic. No option to russia due to the entire world against russia cause of War with ukraine and India take an opportunity to stolen crude oil at subsidy price. This Mafia has spreaded to world and Big countries are struggling with deporting and some are legally staying there. Some are already spoiled others by the Mafia in remaining world. Be careful with india and Indians.

Still don't know how growing Banks shares with fraud Accounts and Audit bribes. Indian Economy is a fraud and fake be careful because if you check records showing 6.5% increasing GDP but became top 5 in GDP and richest countries. Top countries at 27% increase more over

india has no products which are from china labelled as make in india but china not reacting. Even china giving freely people reach at travel expenses our products are not even at travel expense price that to be at 18% to 28% GST.

Indian population reaches high with its competitors china has down by last 15 years. Now India is top in population and these people are influencing others in their country by voting and misleading. Then deported. Still has controversy of Chinies youth which are less or miss. If youth are missing possibility of suspecting to india definitely. Because biological researchs and other surgeries or operations are done very cheaply in India. So if china conformed as you missed then looking to while missing how much violence done at location and if where police are allowed or defeat has to investigate.

Be monitor Indian stock market and gdp due to data has been changing every time support of USA Corporate Companies.

So be careful with India and Indians and don't believe unknown people sometimes naibours or relatives due to indians crimes and situations.

Be avoid indians and be safe.
